Website: <https://www.linkgroup.eu/policy-statements/irish-management-company/>, Telephone number: +353 1 400 5300

PRIP Manufacturer: Link Fund Manager Solutions (Ireland) Limited

Depository: Société Générale S.A. (Dublin Branch) (the "Depository")

What is this product?

Intended Retail Investor: An investment in the Fund is suitable for investors seeking capital growth and that are prepared to accept a moderate to high level of volatility. Investors should be prepared to maintain a long-term investment in the Fund with an initial subscription of £20,000,000.

Term: This fund has no maturity date.

Objectives:

The investment objective of the Fund is to achieve long-term capital growth.

To do this the fund invests in the shares of a diversified range of global companies with a broad range of market capitalisations. The Fund's investments will be limited to recognised markets, as detailed in the Prospectus for the ICAV. The Fund is considered to be an actively managed Fund without reference to a benchmark or comparative index for performance comparison purposes meaning that the Investment Manager has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies. Currency hedging arrangements may be used to reduce the impact of exchange rate fluctuations between the share class currency and the Fund's base currency (GBP) on the value of investments held by the Fund. Derivatives may be used for efficient portfolio management and to manage the risk profile of the Fund.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. In addition to the market price risk, please refer to the fund's prospectus for further information.

If the fund currency differs from your investment currency, you will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are unable to pay you.

We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level. Poor market conditions could impact your returns.

The value of your investment may fall and you may not get back the amount you invested.

Please refer to the ICAV's Prospectus for further details.

Performance Scenarios

Future market performance cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower. What you get will depend on how the market performs and how long you keep the investment.

The figures shown include all the costs of the product itself, but do not take into account your personal tax situation and may not include all the costs that you pay to your advisor or distributor, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Investment: GBP 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Stress Scenario	What you might get back after costs	2 800 GBP	2 420 GBP
	Average return each year	- 72.04 %	- 24.68 %
Unfavourable Scenario	What you might get back after costs	8 600 GBP	8 600 GBP
	Average return each year	- 13.98%	- 2.97%
Moderate Scenario	What you might get back after costs	11 120 GBP	17 610 GBP
	Average return each year	11.21%	11.98%
Favourable Scenario	What you might get back after costs	13 580 GBP	20 840 GBP
	Average return each year	35.8%	15.82%

What happens if the Company is unable to pay out?

The assets of fund are entrusted to the Depositary. If the fund encounters financial difficulties, the assets entrusted to the Depositary (or its delegates) will not be affected. If the Depositary (or its delegates) encounter financial difficulties, the fund could suffer a loss in some circumstances. There is a compensation fund available for investors under the Investor Compensation Act, 1998 (the "Act") where the criteria for payment of compensation under the Act have been fulfilled.

What are the costs?

Costs over time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for two different holding periods. The figures assume you invest GBP 10,000. The figures are estimates and may change in the future. The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed that you invest GBP 10,000 and that in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

Investment: GBP 10,000		
	If you exit after 1 year	If you exit after 5 years (recommended holding period)
Total costs	67 GBP	595 GBP
Impact on return (RIY) per year (*)	0.67 %	0.75 %
