Vermeer Global Fund

ISIN: IE00BZ000W65

This document provides you with the key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Vermeer Global Fund (the "Fund") - Class A1 US Dollar Accumulating

A sub-fund of Vermeer UCITS ICAV ("ICAV") which is an open-ended umbrella type investment fund with segregated liability between its sub-funds.

The Fund is managed by Waystone Management Company (IE) Limited.

OBJECTIVES AND INVESTMENT POLICY

Objective

The investment objective of the Fund is to achieve long-term capital growth.

Investment Policy

To do this the fund invests in the shares of a diversified range of global companies with a broad range of market capitalisations.

The Fund's investments will be limited to recognised markets, as detailed in the Prospectus for the ICAV.

The Fund is considered to be an actively managed Fund without reference to a benchmark or comparative index for performance comparison purposes meaning that the Investment Manager has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies.

Currency hedging arrangements may be used to reduce the impact of exchange rate fluctuations between the share class currency and the Fund's base currency (GBP) on the value of investments held by the Fund.

Derivatives may be used for efficient portfolio management and to manage the risk profile of the Fund.

The investment process entails current value and returns, future strategy and trends and the analysis of potential events.

Portfolio transaction costs may have a material impact on Fund performance.

Dividend Income that the Fund receives is automatically reinvested into the Fund and is thus part of the share value.

You can buy and sell shares in the Fund on any day except, Saturday and Sunday, when banks in Dublin and London are open for normal business.

Further information on the Fund's investment objective and policy can be found in the Prospectus at www.vermeer.london.

This Fund may not be appropriate for those investors with a short investment horizon.

RISK AND REWARD PROFILE

Typically lower rewards ←—————→ Typically higher rewards
Lower risk Higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

This indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The lowest category does not mean risk free as all investments involve risks.

This Fund is ranked 6 because it invests primarily in equities which may have higher levels of price fluctuation than other types of securities.

The Share Class's position on this scale is a reflection of the risk inherent in the Share Class under past market conditions. It does not reflect the risk inherent in any future circumstances or events that differ from what the Share Class has experienced in the past.

Please note that higher possible gains generally also imply higher possible losses. The lowest risk rating does not mean that the Share Class is free of risk.

The risk and reward indicator does not take into account the following risks of investing in this fund:

Additional risks are detailed in the Prospectus including Investment Risk, Derivative Risk, Market Risk, Credit Risk and Liquidity Risk. This list does not purport to be exhaustive and risks of an exceptional nature may arise from time to time. As this Fund has such a broad selection of investment choices, there are many factors that could affect performance.

These could include changes in the economic environment between and within the countries that the Fund has invested in, the performance of different industrial sectors, and individual securities.
